EXPERIENCE

Full Stack Developer

PAVITRASOFT

04/2023 - 02/2024 Vapi

Completed an 11-month virtual internship as a Full Stack Developer at Pavitrasoft, where I transformed digital concepts into fully functional websites. I specialized in creating visually captivating sites with seamless user navigation, understanding the crucial role of a strong online presence in today's interconnected world. Developed tailored web solutions for both startups and established enterprises, ensuring they stood out in the competitive digital landscape.

Dev Internation School

03/2021 - 03/2022 Junagadh

Percentile

78 / 100

SKILLS

Python Django Solidity HTML CSS JavaScript

Bootstrap Rust C C++ Java

Communication Leadership Time Management

PROJECTS

Certificate Authentication System

04/2024 - 06/2024

The Certificate Authentication System is a robust security framework designed to authenticate users and devices using digital certificates. Unlike traditional password-based authentication, this system leverages Public Key Infrastructure (PKI) to provide a higher level of security. Digital certificates, issued by trusted Certificate Authorities (CAs), are used to verify identities, ensuring that only authorized entities gain access to sensitive resources.

DECLARATION

I hereby declare that all the information given above is true and correct to the best of my knowledge.

ACHIEVEMENTS

Hack Proof

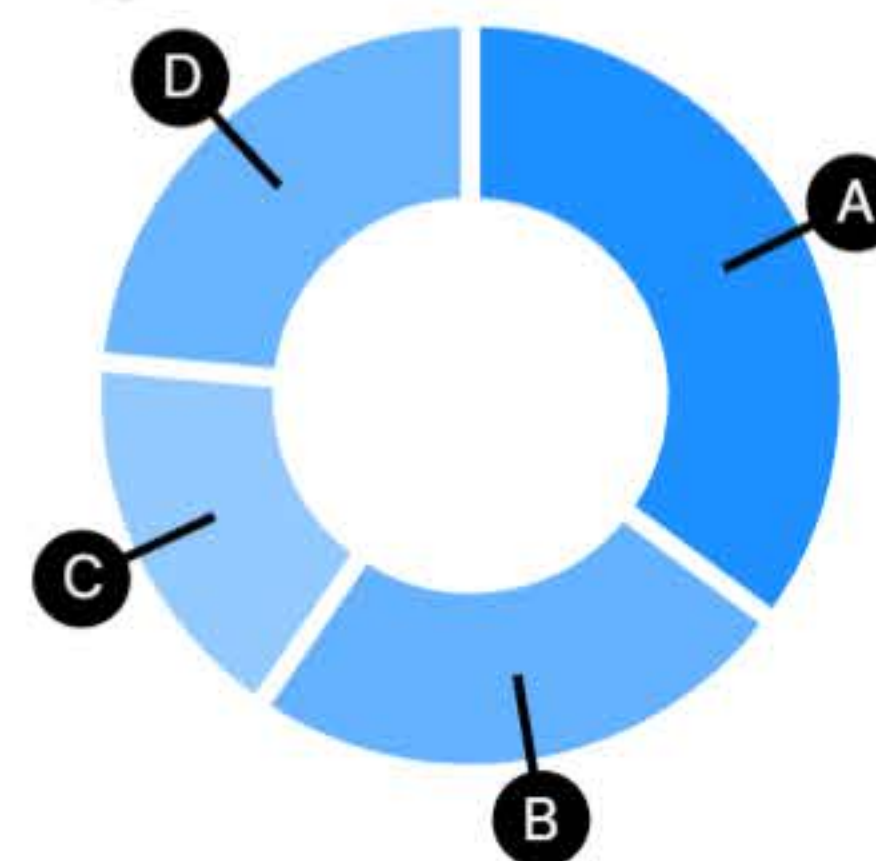

Government Ministry of Home Affairs

Certificate Authentication System

Western Railway

MY TIME

- A Coding
- B Travelling
- C Reading
- D Volleyball

TRAINING / COURSES

Python for Data Science - NPTEL IIT Madras

Complate to Python Course - Data Fair

Basic Python - OpenWeaver

Power skills - Infosys
